

## Water Treatment Chemicals

Industrial Chemicals' extensive chemical product line is supported by a team of water treatment consultants. Our water specialists perform bench-scale laboratory tests and pilot-plant studies to create chemical and mechanical solutions to optimize plant performance, to enhance TOC removal, and to improve water quality. We develop, implement, and monitor distribution-system corrosion control programs to reduce TTHM and HAA5 levels, to protect against lead and copper leaching, to sequester soluble metals, and to eliminate discolored water complaints. Activated Carbon

Aluminum Sulfate  
 Ammonium Bicarbonate  
 Ammonium Sulfate  
 Antifoams  
 Barium Chloride  
 Bentonite  
 Bicarbonate of Soda  
 Bleach  
 Calcium Hydroxide  
 Calcium Hypochlorite  
 Calcium Oxide  
 Carboxymethylcellulose  
 Caustic Potash  
 Caustic Soda (All Grades)  
 Caustic Soda-Beads  
 Chlorine, gas      Chlorine, liquid & granular  
 Citric Acid      Copper sulfate  
 Cupric Sulfate  
 Cyclohexylamine  
 Defoamers  
 Diatomaceous Earth  
 Disodium Phosphate  
 EDTA  
 EDTA plus  
 Ferric Chloride  
 Ferric Sulfate  
 Hydrazine Hydrate  
 Hydrochloric Acid (Muriatic)  
 Hydrogen Peroxide (35%,50%)  
 Lime  
 Monosodium Phosphate (MSP)  
 Morpholine      Muriatic Acid  
 Potassium Hydroxide  
 Potassium Permanganate  
 Silicones  
 Sodium Acid Phosphate (SAP,SAPP)  
 Sodium Bicarbonate  
 Sodium Carbonate (Light ,Dense)  
 Sodium Gluconate  
 Sodium Hexametaphosphate (SHMP)  
 Sodium Hydrosulfite  
 Sodium Hydroxide (All Grades)  
 Sodium Hypochlorite  
 Sodium Silicate  
 Sodium Sulfite  
 Sodium Tripolyphosphate (STPP)  
 Sulfuric Acid
